

Name _____

What Will YOU Leave Behind?

Millions of years from now, humans have migrated to more hospitable planets in far away galaxies. An alien species comes upon the now abandoned Earth and discover amazing artifacts. Much as scientists today study and hypothesize about fossil findings, these aliens draw detailed pictures and make notes over possible uses for these items. Some of their observations are below.

 <p>Spike Heeled Shoes— assumed to have been worn by female criminals as a form of punishment</p>	 <p>Metal Boxes—contain daily offerings to the god “US Mail”</p>	 <p>Seat of Wisdom—used to contemplate life’s great mysteries.</p>
 <p>Long Scrolls of Parchment— found near seat of wisdom; possibly the famous Dead Seat Scrolls</p>	 <p>War Simulator—primitive military training machines designed for early use</p>	 <p>Rubber Constrictor— obviously a popular pet, fed through an opening on the side of the house</p>

Think of items in your everyday life that you would leave behind as artifacts for the aliens to find. These could be items from school or home.

Make a colored illustration on a piece of printer paper to hang in the hallway. Be sure to include the possible name and explanation for your item.
